

## **CARLSBAD HIGH SCHOOL SCIENCE BUILDING** **CARLSBAD HIGH SCHOOL**

H2I Group worked with architect Lionakis, general contractor Erickson-Hall, and CiF to bring new science facilities to Carlsbad High School. We provided Wood Casework and Fume Hoods to increase the safety and functionality in Carlsbad's science labs.

The new space has been designed to meet SEFA-8W standards, aligning its performance characteristics with the same quality utilized by the laboratory and university markets. We used CiF Educator Series Casework in this project to achieve this goal. This project is an example of how we work with schools to provide functional spaces that improve learning environments for students.

### **DETAILS**

Client: Carlsbad High School

Architect: Lionakis

General Contractor: Erickson-Hall

### **SUPPLIER PARTNERS**

CiF

### **SOLUTIONS**

Wood Casework

Fume Hoods
