

UCSF WEILL NEUROSCIENCES BUILDING UNIVERSITY OF CALIFORNIA SAN FRANCISCO

The Weill Neurosciences building is a world-class neuroscience research facility for the UC San Francisco (UCSF) Mission Bay campus. The 282,000-square-foot facility is home to top clinicians researching disorders such as dementia, Alzheimer's, and Huntington's disease. The H2I Group team was brought on as an early design-assist partner to help design custom products, provide detailed cost analysis with each design phase, and participate in design and pull planning meetings.
