

ANDRESS HIGH SCHOOL AUDITORIUM

EL PASO, TEXAS

Andress High School, located in El Paso, Texas, needed all new seating in their auditorium. H2I Group put in just under 500 convention chairs to assist in this project. These chairs had solid oak armrests, HPL end panels, and upholstered outer back and seat pans. The fabric used was Absecon, in sherpa maroon. We also added 64 LED armrest aisle lights for general safety reasons. The seating solutions on this project turned out just as we expected.
