

FIELDHOUSE USA GRAPEVINE

GRAPEVINE, TEXAS

Fieldhouse USA is a community based athletic facility with five locations nationwide in Texas, Washington, and Arizona. Within the Grapevine facility, they wanted each court to remain divided but didn't want to put in a floor-to-ceiling curtain or wall. H2I Group and our partner, Porter Athletic, created a completely customized solution to their needs, covering the short walls between courts in wall padding. Then, custom length divider curtains were suspended from the ceiling and attached to the floor between each padded wall. These decisions gave the space an open feeling, with each court having the area it needs to stay separate. The POWR-Touch 5 gym control system was installed to control all the different aspects of the gym and equipment.
