

MANUFACTURING CLIENT
COTTAGE GROVE, MINNESOTA

An H2I Group manufacturing client was looking for a storage solution to store a large amount of their product within their warehouse. H2I Group installed Vertical Lift Modules (VLMs) from our partner, Vidmar – part of the Stanley Black & Decker Storage Solutions group. This vertical solution created a more efficient space for the client. The work of H2I Group's solution specialists far exceeded the expectations of the client.
