

## TAKEDOWN GYM

### BRAINERD, MINNESOTA

Takedown Gym wanted to build an addition to their existing fitness center, so H2I Group came on board to help them decide which solutions were right for their space. The experts at H2I Group explained all the different types, and based on the use of their space, Takedown Gym ultimately decided on synthetic flooring. The owner knew he wanted his facility to be a high end place where people enjoyed being, so he chose the high end Pro 165 Comfort flooring because of its high performance rating. H2I Group then also assisted in the design of the athletic equipment. With the need for overhead volleyball, basketball, and perimeter netting, H2I Group used its exceptional design strategy to ensure everything fit the space properly. We're proud to announce that Takedown Gym won the 2019 Sports Surface of the Year from Sika USA.
