

## AZTEC RECREATION CENTER SAN DIEGO STATE UNIVERSITY

H2I Group is excited to showcase our recent involvement in the renovation and expansion of the San Diego State University (SDSU) Aztec Recreation Center (ARC). Working closely with McCarthy Builders and the SDSU Associated Students group, H2I Group provided state-of-the-art athletic equipment solutions by Draper and other top manufacturers for this on-campus athletic facility.

Spanning 133,000 square feet, the project was unique in that it was fully funded by students, reflecting the strong need and desire for this modernized and expanded facility. The first phase involved constructing a new addition to the existing center, followed by the renovation of the existing gyms in the second phase.

The renovated Aztec Recreation Center now boasts a range of versatile and modern athletic spaces, including an Olympic weightlifting area, yoga studios, dance studios, volleyball courts, basketball courts, and multiple multi-use athletic spaces.

Now one of the most used facilities on campus, the SDSU Aztec Recreation Center stands as a testament to the power of collaboration and the importance of providing students with top-tier athletic resources to support their overall well-being and success.
