

## **MECHANICAL DESIGN PROGRAM** **MADISON AREA TECHNICAL COLLEGE**

Madison Area Technical College (MATC) has partnered with H2I Group's Tech-Ed Division to further enhance its Mechanical Design Program. Recognizing the importance of hands-on learning and rapid prototyping, this collaboration aims to provide students with direct experience on industry-standard machines. The machines they've purchased through H2I Group include: Universal Laser Systems' PLS6.75 Laser Cutter/Engraver, Bofa's Fume Extraction System, multiple Stratasys 3D printers, and Roland's GS-24 Vinyl Cutter.

Through this initiative, MATC aspires to not only equip its students with invaluable technical skills but also to foster creativity, allowing them to conceptualize, design, and solve real-world challenges.

### **LOCATION**

Madison, WI

### **SUPPLIER PARTNERS**

Stratasys

Universal Laser Systems

Bofa

Roland

### **SOLUTIONS**

3D Printers

Printers & Cutters
