

TEXAS CHILDREN'S HOSPITAL **AUSTIN, TEXAS**

H2I Group provided Architectural Woodwork for the Medical Office Building/Outpatient section of the new Texas Children's Hospital in Austin, Texas. This involved the delivery of Plastic Laminate Casework, Solid Surface Countertops, and Nurse Stations.

The design team's vibrant color palette, aimed at cultivating a positive healing environment, informed our approach. Collaboration with McCarthy Building Companies and Page Architects ensured the project met specific design and functional criteria.
