

ADVANCED MANUFACTURING LAB **SADDLEBACK COLLEGE**

Saddleback College's Advanced Manufacturing Lab in Mission Viejo, California, is a showcase of technological advancement in education, developed through a partnership with the Paton Group, a H2I Group company. We equipped this facility with cutting-edge tools, including sophisticated Stratasys 3D printers, precision CNC machines, and more.

The lab provides an immersive learning environment where students engage in practical applications of design, SolidWorks, AutoCAD, and prototyping. It's a space that not only introduces students to the latest in manufacturing technology but also prepares them for the dynamic demands of the manufacturing industry. The lab's commitment to integrating diverse technological tools ensures that students are equipped with the skills and knowledge needed for success in modern manufacturing careers.
