

COON RAPIDS HIGH SCHOOL GYM FLOOR COON RAPIDS, MINNESOTA

H2I Group recently completed a gym flooring project at Coon Rapids High School in Coon Rapids, Minnesota. After severe water damage affected the school's fieldhouse this past winter, H2I Group was brought on board to manage the rebuild. The team worked closely with Anoka Hennepin Schools to budget, plan, schedule, and install a new Robbins Sports Surfaces maple gym floor, ensuring that the project met all requirements.

Despite the challenges of completing the rebuild during the school year, H2I Group finished the project ahead of schedule and on budget. The new flooring not only resolved the damage issues but also enhanced the overall look and functionality of the gym. The successful completion of the project received positive feedback from the school, which was pleased with the quality and efficiency of the work.
