

ACADEMY OF HOLY ANGELS GYM **RICHFIELD, MINNESOTA**

H2I Group completed the Academy of Holy Angels Gym Floor Replacement project in Richfield, MN, following a catastrophic water event caused by a broken fire sprinkler that rendered the gym's maple floor a total loss. H2I Group worked closely with Academy of Holy Angel's insurance company to assess the damage and determine the necessary scope of work.

Acting as the General Contractor, H2I Group managed all aspects of the project including demolition and removal of the water-damaged floor, bleacher mobilization, materials logistics and installation of a premier Robbins Sports Surfaces gym floor system. Including custom floor graphics and staining. H2I Group successfully completed the installation on time and within budget.

"H2I Group was a pleasure to work with. My main objective was to have a really nice gym floor completed on time and we accomplished that. I'm super happy with how our gym floor turned out. Clinton and John listened to what we wanted and helped walk us through the process and answered all of my questions along the way" - Carolyn Arnebeck, Academy of Holy Angels Athletic Director
