

HEMET HIGH SCHOOL BLEACHER RENOVATION HEMET, CALIFORNIA

H2I Group partnered with DLR Group to renovate the Hemet High School bleachers in Hemet, California. To start this project, we needed to demolish and dispose of both the old wood bleachers on the home side, as well as the plastic, portable bleachers on the visitor's side. From there, we installed new Interkal ESM motorized bleacher seating on both the Home and Visitor's side. The 1643 bleacher seats have Blackout Option B4 and Custom Color Red for aisle and end rails, which matched the school colors of black and red. The purchase of these new Interkal Bleachers was done using TIPS Purchasing Contract. This seating solution gives audiences a comfortable area to watch events in the gym.
