

UCSF PRIDE HALL

ZUCKERBERG SAN FRANCISCO GENERAL HOSPITAL

UCSF Pride Hall is a 140,000-square-foot research and academic facility located at Zuckerberg San Francisco General Hospital and Trauma Center (ZSFG). As the first UCSF-owned building on the ZSFG campus, this state-of-the-art facility was designed to support collaboration among researchers, clinicians, and faculty. The five-story building houses over 800 UCSF employees, including approximately 200 physician-scientists and clinicians, who utilize conference rooms, wet and dry labs, as well as surgical training and simulation facilities.

Our team played a crucial role in outfitting the facility with laboratory solutions, including fume hoods, casework, and lab equipment from various vendors. These installations contribute to the building's ability to foster scientific advancements and hands-on medical training. By delivering top-tier laboratory solutions, we are proud to contribute to a facility that will shape the future of healthcare and innovation for years to come.
