

## AGGIE SQUARE UNIVERSITY OF CALIFORNIA, DAVIS

Aggie Square at the University of California, Davis is designed to support a broad spectrum of life sciences and technology disciplines. This 587,000-square-foot building will host inclusive education and workforce development programs, ranging from entry-level training to advanced research and doctoral studies. With 170 shared table systems throughout the facility, Aggie Square is built to encourage collaboration, discovery, and community engagement.

H2I Group provided comprehensive laboratory solutions to meet the diverse and highly specialized needs of this forward-thinking space. From layout planning to equipment delivery, our team supported every phase to ensure Aggie Square is equipped to handle cutting-edge research and multi-disciplinary lab activities. The result is a future-ready environment that reflects the University's commitment to innovation and inclusivity.
