

MISSOURI STATE UNIVERSITY ROY BLUNT HALL ADDITION SPRINGFIELD, MO

Located in Springfield, MO, the Roy Blunt Hall Addition at Missouri State University expands research and teaching capabilities in Chemistry, Biology, and Geology. H2I Group partnered with BNIM, Research Facilities Design (RFD), and The Whiting-Turner Contracting Group to deliver a full lab package including BedcoLab and CiF casework, Labconco fume hoods and biological safety cabinets, and Durcon epoxy countertops.

All equipment was procured through the Sourcewell cooperative purchasing contract and met strict Build America, Buy America (BABA) requirements. The labs also feature ADA-compliant casework and fume hoods, ensuring inclusive access for all users.
