

OLE MISS CSTI DUFF BUILDING OXFORD, MS

The CSTI Duff Building enhances science and technology instruction at the University of Mississippi with state-of-the-art teaching laboratories. H2I Group and The McCarty Company designed the flexible lab environments to support interdisciplinary learning.

H2I Group provided wood-front steel lab casework, systems casework, exhausted and filtered fume hoods, lab equipment, and architectural millwork. The project team leveraged proactive communication and problem-solving to ensure seamless coordination and deliver highly functional, adaptable STEM spaces.
