

FARGO SPORTS COMPLEX FARGO, NORTH DAKOTA

The Fargo Park District partnered with H2I Group to develop a large indoor facility that expands recreational opportunities in the Fargo-Moorhead region. Phase one includes a hardwood court area and training space. H2I Group worked with architect JLG Architects and General Contractor McGough. The scope of work included installing Robbins wood athletic flooring throughout the facility. The team planned carefully for cold-weather conditions and coordinated with other trades to keep the project on schedule. The completed courts now host local leagues, tournaments, and community events.
