

## R. BROWN MCALLISTER STEM ELEMENTARY CONCORD, NORTH CAROLINA

H2I Group partnered with Rodgers Builders to deliver a vibrant and functional gymnasium for the new R. Brown McAllister STEM Elementary School. Awarded through a public bid, this project replaced the existing school with a modern facility designed to serve elementary school students.

H2I Group provided basketball backstops from Forum Athletic Products, Daktronics scoreboards, and RSL Kodiak telescoping bleachers. The finished gym showcases clean lines, bright color accents, and a flexible seating layout that complements the school's energetic design. Every system was installed to support safe, long-term performance for daily activities, assemblies, and athletic events.
