

## CSU HYDRO WATER BUILDING DENVER, COLORADO

The CSU Spur Hydro building focuses on water innovation, public education, and sustainable resource management. It combines high-tech labs with interactive exhibits.

H2I Group worked with architect Hord CoplanMacht and General Contractor JE Dunn Construction. H2I Group's scope of work included Bedcolab metal and CiF wood casework, and other lab equipment. The team coordinated complex utility needs and sequencing through creative problem-solving. The completed facility now supports both water quality research and public education initiatives.
