

ST. ANDREW'S EPISCOPAL SCHOOL **AUSTIN, TEXAS**

St. Andrew's Episcopal School in Austin, Texas received a full gym upgrade that supports daily athletics and school events. The project team included Harvey Builders and LPA, with H2I Group providing key athletic equipment and interior sports systems. The new space features basketball backstops, volleyball systems, a divider curtain, wall pads, and Interkal telescopic bleachers that improve seating capacity and safety. H2I Group partnered with Porter and Interkal to provide the equipment that shapes the layout and performance of the renovated facility.

The finished gym delivers a bright and open environment with durable finishes, clear sightlines, and efficient equipment integration. The space supports practices, physical education, and multi court competitions. The updated systems give the school reliable performance and a layout that adapts to a range of activities throughout the year.
