

LEE & PENNY ANDERSON ARENA **UNIVERSITY OF ST. THOMAS**

H2I Group designed and installed two dedicated basketball practice gymnasiums for the University of St. Thomas athletic program at the newly developed Lee & Penny Anderson Arena. The project encompassed a combined 16,380 square feet of premium hardwood athletic flooring across one men's and one women's practice facility.

H2I Group provided the Robbins Sports Surfaces UniMax 100 maple hardwood floor system, a high-performance, engineered sports floor designed to meet the rigorous demands of collegiate athletics training. The UniMax 100 system delivers optimal ball response, shock absorption, and surface consistency required for elite practice environments.
