

SEWARD WELLNESS CENTER

SEWARD, NEBRASKA

H2I Group partnered with BVH Architects and Sampson Construction on the Seward Wellness Center, a Sourcewell project for the City of Seward. The owner wanted to work with a single company to furnish and install the athletic floor systems and gym equipment, streamlining installation and procurement. H2I Group provided a Robbins Fusion wood/synthetic floor system, Sportwood Ultra Star flooring, Porter athletic equipment, and Ecore Performance Rally surfacing. The city-owned health and wellness center serves the community with basketball and volleyball courts, an indoor walking track, a fitness room, and aerobics and dance classes.
