UNIVERSITY OF DENVER HAMILTON GYM
DENVER, COLORADO

Hamilton Gymnasium is home to the University of Denver Pioneers volleyball and men's and women's basketball programs. The gym space fits three basketball or volleyball courts, so the seating had to give fans an arena experience on game day and still clear the floor for practice and daily use.

H2I Group replaced the gym's red bench bleachers with Irwin retractable seating fitted with individual upholstered chairs. Each seatback shows off the school logo, and the chairs include armrests, cupholders, and numbered seats. Aisle handrails and stair access run through each section. The system retracts fully against the wall, so the university keeps the flexibility of a multi-court gym. The project won Irwin's 2026 Project of the Year. H2I Group also placed second in Mortenson Construction's Precon Subcontractor of the Year award for its preconstruction work on this project.
